數位曾經遠赴極地考察的學生將連同兩位講者參與緊接的討論環節。
Also joining the interactive session with the speakers after their presentation are students who made polar expeditions before.

極地考察與教育的關係是不可分割的。一方面，極地考察家一直致力於教育下一代。另一方面，來自香港的學生遠赴極地，對極地氣候、環境、科學理論進行研究。這些研究不僅有助於推行環境與科學相關的教育活動，並能同時培養青少年的堅毅意志和領導才能。在這次講座，擁有豐富經驗的極地考察家和年輕的極地考察代表將分享他們對極地考察的體會。

The relationship between polar expedition and education is inseparable. On one hand, polar expeditionists devoted themselves in educating the future. On the other hand, students from Hong Kong made polar expeditions, researching on polar climate, environment and sciences. Through the expeditions, implementation of educational campaigns on environment and science was enhanced and perseverance and leadership of the young participants were fostered. In this seminar, experienced polar expeditionists and representatives of young participants of polar exploration will share their insights of their journey.
