

3 June 2009

Dr Lee Boon Ying
Director of the Hong Kong Observatory
Hong Kong Observatory
134A Nathan Road
Hong Kong, China

Dear Dr Lee,

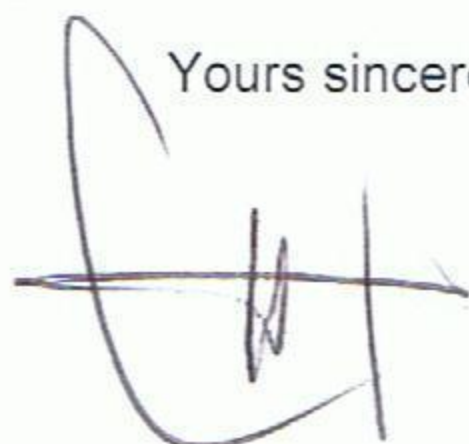

Re: "Carbon Emission Reduction – The Right Thing to Do"

On behalf of HKQAA, I would like to express my deepest gratitude for Hong Kong Observatory's (HKO) support at the captioned event on 12 May 2009. Inspiring presentation from Mr Edwin Ginn, Senior Scientific Officer, has provided valuable insights to our audience. The realization of the event could not be made possible without HKO's generous support.

As we all know a low carbon community requires the collaborative efforts of all parties concerned. We look forward to joining hands with the government and parties from all industries in promoting green initiatives through various channels to reduce carbon footprint. It is hoped that the industry will continue its effort to promote green concepts as a result to save a better planet to our future generations. We look forward to further cooperation with HKO on climate change issue.

Once again, thank you for making the event a memorable occasion.

Yours sincerely,

P C Chan
